Fully Embedded Within Your Existing Infrastructure

PayZen integrates directly into existing EHR and billing systems, operating within current workflows rather than alongside them. Patients receive personalized payment options as part of their standard billing experience, delivered digitally and in real time – not through manual outreach or mail-based enrollment.

The result: measurable financial improvement delivered seamlessly within the systems you already trust.

Proven Results

30% average lift in collections

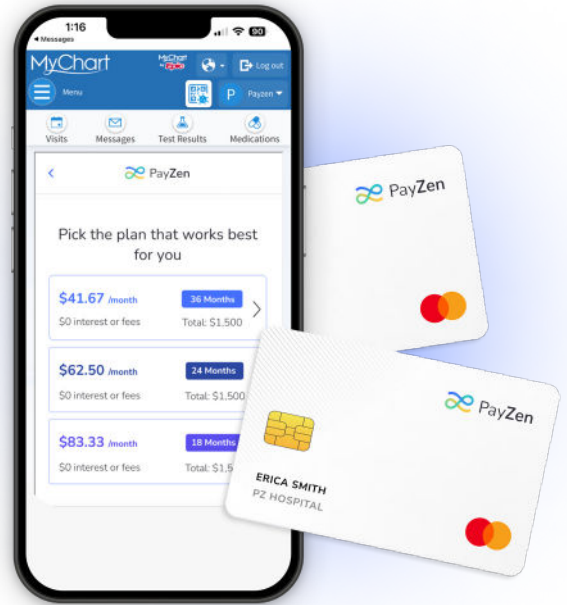

78% enrollment success rate

71 Patient Net Promoter Score
(50% higher than the industry average)

The AI Platform Revenue Leaders Trust

PayZen's predictive AI analyzes 30,000+ data attributes to generate personalized payment options tailored to each patient's financial profile. Plans are interest- and fee-free, delivered through a digital-first experience that increases enrollment while reducing staff burden.

PayZen strengthens patient collections performance across both pre-service and post-service balances. Health systems accelerate cash flow and reduce bad debt, while expanding patient affordability and access — all without increasing operational complexity.

“

My ROI with PayZen has definitely exceeded expectations. I get back way more money than I expected. They are touching more patients than I ever expected them to. They resolve more accounts than I ever expected them to resolve. My initial hesitation with PayZen was because I was jaded about things I heard about other patient financing firms.
